

Cloud Dough

Recipe

- 2 cups corn starch
- 1 cup conditioner (I like using Suave's coconut conditioner – it's cheap & smells good.)

1. Pour cornstarch into a large mixing bowl.

2. Then, pour conditioner into the bowl of cornstarch.

3. Using a spatula, stir and mix the two ingredients until it gets hard to mix with the spatula.

4. Use your hands to finish kneading the dough together. I like to pour out on a hard surface (I use a glossy marble tile) to finish kneading.

5. If the dough is too wet (and sticky), add in a little corn starch. If it's too dry, add in a little more conditioner.
